Full-Stack Development Intern

My role was to design and develop applications for the CNaPS departments and its services

ABOUT ME

I am a dynamic and dedicated young developer, skilled in teamwork and leadership, with technical certifications and internship experience where I successfully guided colleagues and fostered collaboration and innovation

EDUCATION

- 2021 - 2023

ESTI Antanimena ,Antananarivo Madagascar

Bachelor degree of software engineering study program

- 2019 - 2020

ELITE HIGH SCHOOL

High School Diploma

PROJECTS AND WORKS

- **Real-Time Chat App for the CNaPS Intranet**

This project aimed to enhance and simplify internal communication among CNaPS employees. It was developed using Angular, Spring Boot, and Oracle.

- **Application for managing and tracking case files within the Medical Expertise Service of CNaPS**

The project aimed to digitize the Medical Expertise Service of CNaPS to accelerate case processing. It was implemented using Angular, Spring Boot, and Oracle.

- **A facial recognition attendance application**

A personal project that implements an attendance application using facial recognition, built with FastAPI, React.js, and MongoDB. It improves efficiency and accuracy over traditional methods by automating identity verification.

- **Machine learning projects**

- A web application for estimating car prices.
- Customer segmentation using clustering.
- Neural Network for Breast Cancer Detection.
- Football website data scraping.
